The BCPC Congress 2017
Achieving both productivity and safety improvements through better regulation
31 OCTOBER - 1 NOVEMBER | BRIGHTON | UK
Your regulatory support for Plant Protection Products

JSC International are delighted to be a Headline Sponsor at The BCPC Congress 2017.

At JSC, we have a wealth of experience in dealing with complex regulatory and technical issues at all stages of the regulatory process, both for EU Approval and national registrations.

As part of the ERM Group we have access to additional and complementary resources in supporting our clients, enabling cross-discipline working practices to provide novel and innovative approaches to problem solving.

If you would like help with your registrations please visit us at Stand 11 and talk to our Congress team, Andrew Goodyear, Ben Bolton and Kirsty Tucker.

Welcome to the 50th Anniversary BCPC Congress 2017

“Achieving both productivity and safety improvements through better regulation”

Dear Delegates, Speakers and Sponsors,

On behalf of the BCPC and TSGE Forum, a very warm welcome to everyone attending, particularly this year, which marks the 50th Anniversary of BCPC and the start of our tradition of bringing together participants in the EU crop protection industry in one annual, dedicated event.

As in previous years, we will review the status of relevant EU regulations, along with needs and progress (or not) in improvement. But inevitably, this year’s programme focuses on the opportunities and downsides - for both policy and process - of the UK's exit from the EU.

At the start of this period of major change, and for the first time in its 50-year history, we welcome the UK Secretary of State for Agriculture, to hear his vision for the UK's agricultural future – and how future policy can combine improving agricultural productivity with enhanced environmental resources and safety. A number of speakers and an extended session with the UK CRD will all provide opinion on this subject - and on how the UK could continue to have a beneficial influence on EU regulation. Of course, we expect delegates to participate fully by providing their own views!

There will be the usual opportunities to interact with colleagues in the opening reception, the sessions, breaks and the BCPC 50th Anniversary Congress Dinner. I sincerely hope you enjoy and benefit from your time with us.

Dr. Colin Ruscoe - President, BCPC

The BCPC Congress 2017

Achieving both productivity and safety improvements through better regulation

Dr. Anne Alix  
**Dow AgroSciences**

Anne is a senior scientist in the area of environmental risk assessment and risk management. She earned a PhD in Biology and Integrated Pest Management in vegetable crops at the University of Rennes, in France, in 2000. She joined environmental risk assessment as an ecotoxicologist at the French National Institute on Research in Agronomy (INRA) in 2001, and then as a head of the Environment and Ecotoxicology unit at the French Agency on the safety of Food (AFSSA, now ANSES). She linked risk assessment to risk management at the French Ministry of Agriculture as the deputy head of the Section for Regulation and Placing Plant Protection Products on the Market, where she lead the implementation of risk mitigation measures for pesticides, and post registration monitoring. Anne joined Dow AgroSciences in 2011, as their European Regulatory Risk Management Leader. Anne has been involved in a number of expert groups to develop risk assessment methodologies in diverse environmental, some through workshops such as such as ELInK, Focus Landscape and Mitigation or Escort 3, or via SETAC groups, such as Modelink or EMAGPest.

Professor Steve Bradbury  
**Iowa State University**

Steve was until recently Director of the Office of Pesticide Programs in the U.S. Environmental Protection Agency. He led the Office’s evaluations of new and existing pesticides, and coordination with related programs. He advanced risk-based methods for endocrine effects of pesticides and managing pesticide resistance, water quality, endangered species and pollinators. Previously, Steve led efforts to advance human health and ecological risk assessments in water quality, pesticide and industrial chemical programs in the EPA’s Office of Research and Development, and was a member of a recent U.S. National Academies of Sciences committee on biotechnology products and recommending enhancement of the U.S. regulatory system. He has delivered over 70 peer-reviewed publications and presents at international and national scientific conferences. He has a BS in Molecular Biology from the University of Wisconsin-Madison and a PhD in Toxicology and Entomology from Iowa State University, where he is now Professor of Environmental Toxicology.

Dave Bench  
**UK HSE Chemicals Regulation Division**

Dave is now leading the Health and Safety Executive’s (HSE) work to ensure that the UK chemicals regulation framework is operable and effective after the UK leaves the EU. From 2011 to March 2017 Dave led HSE’s Chemicals Regulation Division (CRD) – the UK regulatory authority for plant protection products, biocides, detergents and industrial chemicals. Dave has spent most of his career leading specialist teams and in strategic policy roles. After graduating from York University (applied & environmental biology) he spent the first 10 years of his career in technical roles dealing with risk assessment of chemicals. Throughout the rest of his career he has been responsible for policy development and delivery of regulatory regimes in a range of areas, including genetic modification in agriculture, animal health, marine, and particularly chemicals.

Jean-Pierre Busnardo  
**DuPont Crop Protection**

Jean-Pierre is an agronomist who started his career in Africa where he conducted agronomic research on tropical food crops. He joined the Crop Protection Industry in 1986 and has since held portfolio regulatory assignments in several companies, with a primary international orientation (European or global). Jean-Pierre joined DuPont in 1993 and he is currently the Brussels-based Regulatory Affairs Manager for the company’s crop protection business. Jean-Pierre is a member of the Regulatory Policy Team of the European Crop Protection Association (ECPA).

Dr. Peter J Campbell  
**Syngenta**

Peter is Head of Product Safety External Research Collaborations and a Senior Environmental Risk Assessment Specialist in the Environmental Safety Department of Syngenta based at the Jealott’s Hill Research Centre in UK. He has worked in the field of ecotoxicology and environmental risk assessment of pesticides for 23 years, with the first 7 years being in the UK Pesticide Regulatory Authority. Peter is currently responsible for leading Syngenta’s Pollinator Research efforts. He is also a member of the European Crop Protection Association’s (ECPA) Environmental Expert Group and is the Chairman of the ECPA Pollinator Steering Team. He is a long term member and Fellow of the Society for Environmental Toxicology and Chemistry (SETAC).

---

The BCPC Congress 2017
Achieving both productivity and safety improvements through better regulation

David Cary
International Biocontrol Manufacturers’ Association, IBMA
David has been in place as the inaugural Executive Director of this dynamic global trade association with a strong European focus since 2010. His career has been focused on IPM, resistance management, implementation of biocontrol techniques, and systems based control of pests and diseases. He is passionate about reducing the reliance on traditional pesticides through finding, developing, registering and bringing to market new solutions to feed a growing world population whilst respecting biodiversity, the environment and protecting human health. David is an entomologist by training and spent several years co-ordinating, conducting, assessing, reporting efficacy trials and supervising regulatory compliance for biological agricultural inputs. He actively participates in promoting the biocontrol industry and ensuring that any regulation is proportionate to risk. He promotes a globally harmonised regional regulatory and product development focus and is confident that we will see more global co-ordination in the near future. He was a key player in the formation of BPG (BioProtection Global) and works closely with international bodies including OECD, FAO and EPPO.

Dr. John Doe
Parker Doe Partnership LLP
After having previously worked as a pharmacologist in pharmaceutical industry in the areas of asthma, skin allergy and chronic obstructive pulmonary disease, John joined ICI’s Central Toxicology Laboratory (CTL) in the late 1970s. He initially worked in inhalation toxicology then managed studies across the full spectrum of regulatory toxicology including chronic, reproductive and developmental toxicology. John worked in industrial chemical and agrochemical toxicology for many years, becoming Director of CTL in 2003 and Head of Product Safety for Syngenta in 2006. John was Chairman of ECETOC Scientific Committee from 2006 until 2010 and he was a member of the UK Animal Procedures Committee from 2004 to 2012. In 2007, his work on revising the assessment of agricultural chemicals was highly commended by NC3Rs.

Gabrielle Edwards
Defra
Gabrielle has been Deputy Director for Chemicals, Pesticides and Hazardous Waste in Defra since 2016. Her previous roles included Deputy Director for Water Services, leading the development of the 2011 Water White Paper and the legislation that became the Water Act 2014 and for the Bovine TB Programme. Gabrielle was seconded to the Economic and Domestic Secretariat in the Cabinet Office from 2003 to 2005 to cover Home and Constitutional Affairs and Environment and Agriculture policy. Before that, she had a range of posts, largely dealing with environmental policy, including leading on developing the UK’s national climate change programme and a period as private secretary to the Minister for the Environment.

Gabrielle has been Deputy Director for Chemicals, Pesticides and Hazardous Waste in Defra since 2016. Her previous roles included Deputy Director for Water Services, leading the development of the 2011 Water White Paper and the legislation that became the Water Act 2014 and for the Bovine TB Programme. Gabrielle was seconded to the Economic and Domestic Secretariat in the Cabinet Office from 2003 to 2005 to cover Home and Constitutional Affairs and Environment and Agriculture policy. Before that, she had a range of posts, largely dealing with environmental policy, including leading on developing the UK’s national climate change programme and a period as private secretary to the Minister for the Environment.

The Rt. Honourable George Eustice MP
Minister of State for Agriculture, Fisheries and Food
After a time working in the family farming business, George gained nine years political campaign experience with the Conservative Party, and was Head of Press under Michael Howard between 2003 and the 2005 General Election. He was David Cameron’s Press Secretary from June 2005 until the end of 2007. George was elected as MP for Camborne, Redruth and Hayle in May 2010 and has championed economic regeneration in Cornwall. He was a member of the Environment and Rural Affairs Select Committee on which he concentrated on a variety of issues including water poverty in rural areas and dangerous dog legislation. In Parliament he has supported reform of the Agricultural Wages Board and the establishment of a Groceries Code Adjudicator, as well as speaking in debates on the Common Fisheries Policy. In April 2013 he was appointed onto the Downing Street Policy Board, with responsibility for Energy and the Environment, Food and Rural Affairs. Whilst with the Board he presented a variety of new policy ideas, including methods of water pricing reform. In October he was appointed Parliamentary Under-Secretary of State for DEFRA and was promoted to Minister of State in May 2015.
Achieving both productivity and safety improvements through better regulation

Professor Lin Field
Rothamsted Research
Lin is an insect molecular biologist and Head of Biointeractions and Crop Protection at Rothamsted Research. Lin’s personal research interests focus on understanding insecticide mode of action and resistance, at the biochemical/molecular level. Her research team uses the latest genomic techniques to understand resistance and insecticide selectivity, and seeks to apply this to better use of pesticides, through links with partners in the agronomy, farming and agro-chemical sectors. Lin has also developed a knowledge of alternative pest control strategies, especially the use of chemical ecology and GM technologies. The overall aim of Lin’s work is to deliver effective and sustainable crop protection that minimises effects on non-targets and the environment. Lin is an active participant in the debate on whether pesticides are needed and how they may affect bee populations. This has involved speaking to fellow scientists, farmers, bee keepers, policy makers and the public.

Dr. Jon Knight
Agricultural and Horticultural Development Board (AHDB)
Jon is the Head of Crop Health and Protection (CHaP) for the Agricultural and Horticultural Development Board (AHDB) where he is responsible for developing and implementing research and development strategy for pests, weeds and diseases for agricultural and horticultural crops. The CHaP team works closely with industry and government to ensure the availability of a range of suitable crop protection measures for a wide range of crops. Originally trained as an agricultural zoologist he has worked in the broad area of pest management over the last 20 years at Imperial College and moved to AHDB at the start of 2012 to Head R&D for Horticulture. Research work on over 60 projects has ranged from implementation and management of practical pest control practices both in the UK and overseas to the development of new approaches to Pest Risk Analysis and plant health issues. He is currently a member of the Plant Health Advisory Forum and holds an honorary position at Imperial College London.

Dr. Martyn Griffiths
BAYER S.A.S.
Martyn graduated from University of Newcastle Upon Tyne and obtained his doctorate in field of liquid fertilisers from Harper Adams College. His involvement in crop protection started 26 years ago with Schering. After 5 years of field development experience, he moved to Frankfurt, Germany with AgrEvo, where he held a number of positions including responsibility for registrations in China, Taiwan and Korea. With the formation of Bayer CropScience, he has worked in the European Regulatory Affairs team in Lyon, France and his current position is Senior Regulatory Policy Manager in EMEA Regulatory Science. He is chairman of ECPA Regulatory Policy Team.

Dr. Scott Hawley
Enviresearch
Scott is an environmental risk assessor with Enviresearch Ltd. (Newcastle, UK) with a specific interest in higher tier approaches to evaluation the environmental fate and behaviour of plant protection products. Scott has previously worked within the US government on issues of climate change and the fate of chemicals in the Environment. Scott has a PhD in geochemistry from Durham University and BSc from University of Miami in Geology and Chemistry.

Dr. Richard Green
Dow AgroSciences
Richard has been working as a toxicologist in the crop protection industry following completion of his PhD at the University of Birmingham. He previously worked for Syngenta and is currently with Dow AgroSciences. Richard’s areas of specialism include mechanistic toxicology and endocrine disruption. Richard is an active member of a number of endocrine expert groups, including those of the European Centre for Ecotoxicology and Toxicology of Chemicals (ECETOC) and the European Crop Protection Association (ECPA). He is currently part of the group working to update the OECD guidance document on the test guideline for evaluating chemicals for endocrine disruption (OECD Guidance Document 150).

Dr. Jon Knight
Agricultural and Horticultural Development Board (AHDB)
Jon is the Head of Crop Health and Protection (CHaP) for the Agricultural and Horticultural Development Board (AHDB) where he is responsible for developing and implementing research and development strategy for pests, weeds and diseases for agricultural and horticultural crops. The CHaP team works closely with industry and government to ensure the availability of a range of suitable crop protection measures for a wide range of crops. Originally trained as an agricultural zoologist he has worked in the broad area of pest management over the last 20 years at Imperial College and moved to AHDB at the start of 2012 to Head R&D for Horticulture. Research work on over 60 projects has ranged from implementation and management of practical pest control practices both in the UK and overseas to the development of new approaches to Pest Risk Analysis and plant health issues. He is currently a member of the Plant Health Advisory Forum and holds an honorary position at Imperial College London.

The BCPC Congress 2017
Achieving both productivity and safety improvements through better regulation

Dr. Tina Metha
Dow AgroSciences Ltd
Tina joined the Department of Human Health Assessment at Dow AgroSciences in 2001 as a Regulatory Toxicologist and became the EMEA/APAC Toxicology and Risk Assessment Leader in July 2014. Tina established a Crop Life International cross-industry team in 2015 to develop the first aligned Agrochemical Industry Vision for global implementation of Exposure-Based Assessment, to bring a paradigm shift in support of globally harmonised, risk assessment-based, regulatory decision-making. She significantly contributes to human health assessment strategies, including toxicology development programmes, predictive toxicology and external advocacy. Tina is a member of various industry groups promoting best practices, encouraging relevant guidance and methodology developments (e.g. non-animal approaches to acute toxicity testing and cumulative risk assessment). Tina actively collaborates with a number of 3Rs initiatives, including NC3Rs, CAAT and OECD. Tina has been involved in strategic development of new technologies focussing on science and collaborative research initiatives including Horizon 2020 consortium projects.

Tony Pexton
BCPC
Tony Pexton, OBE is a Yorkshire farmer, overseeing the operation of the family business. He is also Chairman of NIAB and was Chairman of the Sustainable Arable Link Research and Development Programme Management Committee for Defra until the LINK programme was terminated earlier this year. He was elected to the NFU Council in 1981 and went on to serve as Chairman of the National Cereal Committee from 1987 to 1992 and as Vice-President and Deputy President between 1992 and 2000. He has also served on the Council of the Oxford Farming Conference, acting as Chairman in 2002, and as a Board member of Assured Food Standards, and Chairman of the Assured Combinable Crops Scheme. Between 2002 and 2004 he was President of the Guild of Agricultural Journalists and appointed Chairman of the Farmers Club in 2007. In 2005, he was awarded the OBE for services to agriculture.

Steve Norman
RidgewayEco
Steve is an Ecotoxicologist based in Oxfordshire UK, working as a consultant to the crop protection industry. He is a passionate advocate of risk assessments & mitigations which are grounded on agronomic & ecological reality. His career began in 1990 with 10 years at UK Pesticides Safety Directorate (now known as ‘CRD’). Most of this decade was dedicated to ecotoxicology (his MSc specialism) including drafting EU guidance and the ‘LERAP’ scheme. In 2001, he switched to Makhteshim Agan, based in Brussels. For 8 years he was responsible for risk assessment and study-generation across a diverse pesticide portfolio. In 2009 he moved to Dow AgroSciences in the UK, where he designed and managed higher-tier ecotoxicology studies – particularly for chlorpyrifos. For the latter, he also championed the ‘Say No to Drift’ campaign – which triggered a sharp increase in uptake of low-drift nozzles by UK orchard growers. Through his consultancy business (‘RidgewayEco’), Steve designs and manages higher-tier programs including wildlife field studies and aquatic microcosms, for a range of clients.

Dr. Colin Ruscoe
BCPC
Colin is the Executive Chairman and President of the BCPC (British Crop Production Council). He is also a Director, SynTech Research Inc., a leading agrochemical and seeds R&D CRO, and member/chair of Scientific Committees of the IVCC (Innovative Vector Control Consortium), which sponsors development of new products to eliminate malaria and dengue disease vectors. Previously he worked at Syngenta/Zeneca/ICI Agrochemicals, in a number of senior management positions, including Research Stations, R&D Planning, Global Product Development and Regulatory, European Product Development, Bioscience Research, and Insecticide Discovery.

Janet Williams
Bayer CropScience Ltd
Janet is the Regulatory Affairs Manager for Bayer CropScience Ltd in the UK and Ireland. Janet has a degree in Environmental Science from the University of Warwick and a Master’s degree in Toxicology from the University of Kentucky, USA. She has more than 25 years of experience working in agrochemical registration in the EU, working for Fisons, Rhone-Poulenc and Aventis, as well as Bayer. She is manager of a team of six Regulatory Affairs Specialists at Bayer and is involved in all aspects of legislation with any relation to agrochemicals, including involvement with EFSA and the EU Commission. She is also Chair of the Crop Protection Association Policy and Regulatory Group and is in regular dialogue with UK HSE/CRD and Ireland PRCD.
Sustainable and productive agriculture needs a continuously innovative approach for improved management of crop production. SGS provides services in the following activities:

- Field research
- Analytics
- Development
- Demonstration trials

SGS is GLP and GEP certified, methods used according to EPPO/CEB, WHO-FAO, OECD and EU/EPA guidelines.

Find co-registrants to support your plant protection products in Europe

*KÆLTIA* offers your company the possibility to find other co-registrants through the recently published KPPC System (KÆLTIA Plant Protection Consortium IT System) in order to join forces and share registration costs for the plant protection products that you would like to market in Europe.

For more information, please contact us at plantprotection@kaeltia.com or visit KPPC System web site pppconsortium.kaeltia.com

Other services that KÆLTIA offers:

**BIOCIDES & ANIMAL HEALTH**
- Data Gap Analysis
- IUCLID dossier
- Risk assessments
- R4BP3 submissions
- Study monitoring
- Consortium management
- Liaison with Authorities

**AGROCHEMICALS**
- Data Gap Analysis
- Draft Registration Report
- Risk assessment
- Comparative assessment
- Study monitoring
- Consortium management
- Liaison with Authorities

**REACH & CLP**
- REACH impact
- IUCLID dossier
- Consortium management
- Only representative
- CLP classification
- Extended-SDS
- Liaison with Authorities

**OTHER SERVICES**
- Fertilizers
- Biostimulants
- Food and feed additives
- Food processing aids
- Cosmetics
- Detergents
- Medical devices

Whatever your industry and whatever your challenge, please contact us to discuss how we can help you to get your products on the market.

*Read more about our services in www.kaeltia.com*

</table>
| 09.00 – 09.15 | Welcome and Introduction  
Dr. Colin Ruscoe (BCPC)  
Chair  
Tony Pexton (BCPC)                                                                                          |
| 09.15 – 09.50 | A perspective from the Minister of State for Farming  
The Rt. Honourable George Eustice MP (Minister of State for Agriculture, Fisheries and Food)                                               |
| 09.50 – 10.20 | Problems and opportunities for UK crop protection after 2019  
Dr. Jon Knight (Agriculture & Horticulture Development Board, AHDB)                                         |
| 10.20 – 11.00 | The story of Neonicotinoids and bees - A scientist’s perspective  
Professor Lin Field (Rothamsted)                                                                             |
| 11.00 – 11.30 | Morning Break                                                                                                                                                                                                |
| 11.30 – 12.00 | Neonics and Bees in Europe: Update on three key processes and next steps  
Dr. Peter Campbell (Syngenta)                                                                                 |
| 12.00 – 12.30 | Optimising crop protection regulatory systems through governance and risk analysis - Experience from the US  
Professor Steve Bradbury (Iowa State University)                                                             |
| 12.30 – 13.00 | Q&A Session                                                                                                                                                                                                   |
| 13.00 – 14.00 | Lunch Break                                                                                                                                                                                                   |
| 14.00 – 14.30 | How risk management of agrochemicals can improve safety and productivity  
Dr. Anne Alix (Dow AgroSciences)                                                                            |
| 14.30 – 15.00 | Proportionate regulation for low-risk biological inputs to agriculture  
David Cary (IBMA)                                                                                             |
| 15.00 – 15.30 | Afternoon Break                                                                                                                                                                                               |
Dr. Martyn Griffiths (Bayer S.A.S.)                                                                           |
Jean-Pierre Busnardo (DuPont Crop Protection)                                                                |
| 16.30 – 17.00 | Q&A Session                                                                                                                                                                                                   |
| 17.00 – 17.30 | Endocrine disruption  
Dr. Richard Green (Dow AgroSciences)                                                                            |
| 17.30 – 17.50 | Higher-tier aquatic ecotox studies under the EFSA Aquatic Guidance Document: Extracting key risk assessment questions to design robust and relevant higher-tier experiments on Plant Protection Products  
Steve Norman (RidgewayEco)                                                                                  |
<p>| 19.30 | Congress Dinner (Mercure Brighton Seafront Hotel)                                                                                                         |</p>

TSGE CONSULTING

Plant Protection Regulatory Affairs
Our experts are here to help

Where regulatory demands under Regulation (EC) 1107/2009 continue to increase in complexity, TSGE’s objective is to enable the industry to meet these challenges, and to support the growth and development of new and existing products in the European market. Contact us to discuss your requirements on +44 (0) 1423 799 633 or tsge@tsgeconsulting.com

We bring the international markets to our client’s reach.

**Market Intelligence**
We use multiple key sources of information to generate a clear picture of the market, such as potential customers, barriers, competitors, and its growth potential. We simply facilitate our customer’s decisions with the most complete information.

**Regulatory Affairs**
Development and Registration of crop protection products, and unrivalled expertise to assist with the regulatory requirements for the crop protection submissions. Regulatory process under control.

**Sales Strategies**
We identify the right channels according to each product and Market. Facilitate the best agreements and introduce a sales monitoring and representation service, to ensure forecast achievement.

**Mergers & Acquisitions**
One plus one makes three: This equation is the special alchemy of a Merger or an Acquisition. The key principle behind buying a Dossier or a Company, is to generate value over and above the investment.

We are actually the only company in the Plant Protection field, that can fully support the client to reach their targets throughout the whole internationalization process.

OUR GLOBAL REACH...

Guiding you through the regulatory maze

Kerona Scientific Ltd is a leading provider of regulatory services to the agrochemical and biocide industries

- Strategic advice on product development programmes
- Comprehensive data gap analysis
- Study commissioning and monitoring
- Project management of AIR renewal programmes
- Preparation of full zonal dRR dossiers
- Preparation of risk assessments

Contact: Dr. Irene McGrath,
30 Thomas Hand Street,
Skerries, Co Dublin,
K34 RX24, Ireland.
Tel: +353 1 849 5284
email: info@kerona.ie

First class trial services

We offer customized trials from planning to reporting all across Europe

Contact: Dr. Paul Reh and Kirsten Heitsch
Ehlbeek 2, 30938 Burgwedel, Germany

Supporting Your Market Access!
Growing globally – to provide a leading regulatory offering

Our European service:

- Biological Assessment Dossiers (BADs)
- Draft Registration Reports (dRRs)
- National and zonal dossiers
- Ecotoxicology risk assessments
- Chemical and bio-pesticides: herbicides, fungicides, insecticides, PGRs, seed treatments, adjuvants
- Re-authorisation, formulations, extension of use, mutual recognition.

**SynTech provides a full EU efficacy package – from field trials to BADs**

For further information on SynTech’s global regulatory services visit:

syntechresearch.com/what-we-do/regulatory-affairs/

Agrochemicals & Biocides: Residues
- Full study management
- Residue studies (field trials in collaboration with global partners)
- Analytical phases for a wide range of study types
- Analytical method development
- Method validation / ILV studies
- Storage stability studies
- Animal feeding studies
- Full range of operator exposure studies
- Soil, water and sediment characterisation

Agrochemicals & Biocides: Products
- Physico-chemical testing
- Storage stability
- Method validation
- Biocides analysis
- Formulation development support
- Photostability testing
- Batch release, certificates of analysis
- Method development or modification

Pharmaceutical Analysis
- Raw material and product analysis
- Powders, capsules, tablets, creams, gels
- Active ingredient and impurities content
- Residual volatile organic compounds determination
- QC release, certificates of analysis
- Method development including stability indicating methods
- Method transfer / Validation
- Storage stability trials to current ICH Guidelines

CEMAS is a leading, dynamic contract analytical company established in 1989 that specialises in generating GLP, GMP and GCP compliant registration data on behalf of the pharmaceutical, agrochemical [91/414/EC (1107/2009)] and biocides (528/2012(EU BPR)) industries.

CEMAS, Imperial House, Oaklands Business Centre, Oaklands Park, Wokingham, Berkshire, RG41 2FD UK. +44 (0)1344 887100

TECHNOLOGY
LC-MS/MS
ABSciex 4000, 5000, 5500 & 6500+ MS/MS with Agilent 1100/1260 HPLC, 1200 UPLC or Spark Holland Symbiosis HPLC System

GC & GC-MS
Agilent 6890GC with ECD, FID, NPD or 5973 MSD, 7890B/M977HES. Multi-mode, headspace or thermal desorption sample introduction.

HPLC
Agilent HPLC systems with UV, MWD and DAD Detectors

OTHERS
ICP-MS
FTIR

STORAGE
Range of environmentally controlled and continually monitored temperature storage including 18˚C walk-in freezers and walk-in refrigerator at 2-8˚ and environmentally temperature and/or humidity controlled cabinets for the conduct of accelerated and long-term storage stability studies.

SAMPLE PREPARATION
Range of equipment for preparation of all sample types, e.g. fruit, vegetables, grain, soil, tissues, insects.

NOTES:
Since 2001, APC has been delivering bespoke and innovative solutions to our customers in the support of EU and International Registrations.

We can assist you in the areas of: Agrochemicals, Biocides and REACH.

---

**IPC is an independent, bi-monthly magazine is the leading magazine in the world dealing with all aspects of pest prevention and pest eradication.**

Because pests recognise no national boundaries, the problems they cause are increasingly being approached from an international perspective.

**IPC provides authoritative reviews of pest control developments worldwide, with news, articles, reviews, features and comments. It is published in the interest of everyone concerned with the control of infestation of all types - in agriculture; in food manufacturing, storage and distribution; in domestic, commercial and industrial premises.**

**IPC also provides information on control and protection against various diseases transmitted by insects.**
